

Sharad Kumar

Senior MERN / Full-Stack Engineer

Indore, India | +91-8109618802 | sharadkumarw23@gmail.com | linkedin.com/in/sharad-kumar-dev | github.com/sharad1996

Professional Summary

Senior Full-Stack Engineer (MERN / Next.js) with 7+ years shipping production SaaS, e-commerce, and event platforms serving 10k+ daily active users. Own features end-to-end — system design, GraphQL/REST APIs, automated testing (Jest, Cypress, Playwright), and deployment on AWS/GCP with Docker and Kubernetes. Mentored 4–5 engineers on code quality and architecture, and delivered consistently in Agile/Scrum teams across startup and enterprise environments.

Core Technical Skills

Frontend: React, Next.js, TypeScript, Redux, Redux-Saga, Gatsby

Backend & APIs: Node.js, Express, NestJS, REST APIs, GraphQL, Microservices, JWT Authentication, Role-Based Access Control

Databases: MongoDB, PostgreSQL, MySQL, Redis, DynamoDB, Firebase

Cloud & DevOps: AWS (EC2, S3, Lambda), GCP, Docker, Kubernetes, Terraform, CI/CD (GitHub Actions), Serverless

Testing & Quality: Jest, React Testing Library, Cypress, Playwright

Practices: Agile/Scrum, Code Review, Mentorship, Performance Optimization, Monitoring (Sentry, Grafana)

Professional Experience

Technomatz IT Solutions — Senior Software Engineer *Mar 2024 – Present*

- Own the Node.js REST API layer for 3 core products; redesigned query patterns and caching to cut average response time from 400ms to 300ms (25%) under 10k+ daily active users.
- Mentor a team of 4–5 engineers — run code reviews, pair on complex features, and set testing standards using Jest and Cypress, reducing post-release defects and shortening new-hire ramp-up.
- Implemented JWT-based authentication with bcrypt password hashing and role-based access control, closing gaps identified in an internal OWASP security review and cutting auth-related incidents by 40%.
- Led rollout of a shared application framework across teams, enabling zero-downtime deployments through blue-green releases.

Careator Technologies — Senior Software Engineer *Apr 2022 – Feb 2024*

- Rebuilt the CI/CD pipeline (GitHub Actions, Docker) and standardized environment setup and documentation, cutting new developer onboarding time by 30%.
- Root-caused recurring production incidents tied to memory leaks and unindexed queries, cutting unplanned downtime by 20%.
- Set up proactive monitoring and alerting (Sentry, Grafana), maintaining 99.9% uptime across the product suite.

Empplan — Senior Software Engineer *Aug 2021 – Apr 2022*

- Re-architected slow frontend components (code splitting, memoization, image optimization), improving page load performance by 35% across browsers and devices.
- Rebuilt key user flows mobile-first, lifting engagement across 20+ device types used by the client base.
- Worked in two-week Agile sprints with cross-functional and remote teams (GitHub, Jira, Slack), keeping releases predictable.

Bestpeers Infosystem — Software Engineer *Sept 2017 – Jul 2021*

- Built and maintained Node.js + MongoDB APIs powering SaaS and e-commerce products used by 10k+ daily users.

- Cut frontend load times by 40% through lazy loading, Redux performance tuning, and code splitting.
- Delivered multiple concurrent client projects on schedule while holding enterprise-grade quality bars, growing from junior to senior contributor over a 4-year run.

Key Projects

Codebase — A/B Testing Tool

React, Node.js, AWS lambda, GraphQL, MongoDB, Claude, Jest, React-testing-library

- Built reusable React components with Shadcn UI, reducing UI defects by 25%.
- Create multiple lambda functions for getting the data from big queries and doing calculations for generating A/B test analysis reports for clients.
- Built an AI-powered review analysis module that scraped client reviews and used the ChatGPT API to generate structured sentiment reports.

Empplan — Sales Promotion Platform

React, Node, Angular, Redux-Saga, GCP, Jest, React-testing-library

- Implemented core e-commerce workflows (catalog, cart, payments) supporting multi-region campaigns.
- Integrated GCP-based storage for secure, scalable asset handling.

Remo — Virtual Event Management Platform

React, Node, Socket, Firebase, Jest, React-testing-library

- Built real-time chat and conferencing features supporting hundreds of concurrent users.
- Improved platform scalability, increasing organizational usage and engagement by 22%.

Costco — E-commerce Application

Next.js, React, Jest, React-testing-library, Gatsby

- Built a high-performance Next.js frontend, improving page load speed by 30% and increasing conversions.
- Partnered with design and backend teams to deliver a seamless shopping experience.

Education

B.E., Information Technology — Rajiv Gandhi Technical University, 2017
